

Feeding is going well during the newborn period after day four if...

- Your baby nurses 8-12 times in 24 hours.
- Your baby sucks actively for 10-20 minutes on the first side and you hear swallowing.
- Your baby has 6-8 wet diapers and at least 3 yellow dirty diapers per day.
- Your baby appears satisfied after nursing
- You feel full before feeding and softer after nursing.

Contact your care provider and/or a lactation consultant if you have concerns or...

- You don't feel your milk increase by day three or four after birth.
- Your baby is very sleepy and doesn't wake to nurse or is too fussy to latch.
- Diaper count is less than above or uric acid crystals (red dust in the urine) are present.
- You have feeding related pain.
- You are uncomfortably full and don't feel softer after nursing.
- You or your baby has a fever.
- You have flu like symptoms.
- You are considering using formula (or have been advised to use formula) because of breastfeeding problems.

Washington State Protects Your Right to Breastfeed in Public

2001: Breastfeeding in public is not considered indecent exposure thanks to 9A.88.010 and the right to pump in a clean designated space at work is encouraged by RCW 43.70.640.

2009: Breastfeeding mothers are protected under state anti-discrimination laws. No one can tell you to leave or cover up while nursing thanks to RCW
